Mrs. Leena Gupta  
Mrs. Rekha Rani**

## About the Institution:

The history of this college can be traced back to 1901 when Bhagwan Dev Atma, the most worshipful founder of Dev Samaj established Dev Samaj Girls High School, Ferozepur City in the times when education of girls was very much despised. This premier institution served as an incentive for the establishment of many reputed educational institutions in North India. In Chandigarh, a beginning was made by establishing Dev Samaj Girls High School and Dev Samaj Junior Model School in 1957. Dev Samaj Managing Council decided to widen the scope by starting a Degree College and College of Education in Chandigarh. Consequently, on 24th July, 1981, Dev Samaj College for Women, Chandigarh came into existence. This college has carved a distinctive place for itself in Chandigarh and is among the top colleges affiliated to Panjab University.

## About the Seminar:

The key objective of this seminar is to discuss the energy transition process in India from fossil fuel to green energy and to explore the technological and socio-economic issues associated with it. The theme and sub-themes of the seminar also want to focus on the sustainability and affordability of green energy use in India to advance economic development, improve energy security, increase access to energy, and mitigate climate change. This seminar is dedicated to discuss the government policies and strategies, as well as the economic environment which can attract foreign investment to ramp up and push India as one of the top leaders in the world's renewable energy markets. The recommendations based on the outcomes of the discussion would provide useful information for policymakers, innovators, project developers, investors, industries, associated stakeholders and departments, researchers, and scientists and will result in social benefits above and beyond the economic and technological advantages.

## Sub-Themes of the Seminar:

### Session I: Morning

1. Green energy and socio-economic issues
2. Energy transition: Policy, governance and regulation
3. Energy management and challenges
4. Behavioural barriers and boosters towards energy transition
5. Green economy and sustainability
6. Energy cooperation & trade
7. Geopolitics of renewable energy

## Session II: Evening

8. Concept of self-sustainability (Meeting our own energy needs through clean energy sources)
9. Changing energy mix
10. Technological advancements in energy transition
11. Innovations in energy-measurement
12. Era of electrical vehicles
